

Anatomy of a Typical Animal Cell

- | | |
|---|---------------------------------|
| 1-Plasma membrane | 11-Nucleus |
| 2-Endosome (invagination of extracellular material) | 12-Nucleoplasm |
| 3-Secretory Vesicle | 13-Nuclear envelope |
| 4-Cytoplasm | 14-Nuclear pore |
| 5-Golgi apparatus | 15-Nucleolus |
| 6-Golgi vesicle | 16-Rough endoplasmic reticulum |
| 7-Vacuole | 17-Smooth endoplasmic reticulum |
| 8-Lysosome | 18-Ribosomes |
| 9-Peroxisome | 19-Mitochondrion |
